# WELCOME TO ISLAND STONE

CREATING A WORLD OF DIFFERENCE.

2018 marks twenty years since our company began sourcing, processing, and designing stone products that have enhanced homes, commercial projects, luxury retailers and hotels across the world.

Our steadfast team continues to create products that convey both the timelessness of tradition and the modern, chic, and functional aesthetic suited to today's consumer.

This dedication to innovation has allowed our range of tiles and claddings to encompass exceptional glass and wood offerings. We honor the natural world that gives us inspiration and beautiful materials by reusing, recycling, and taking care of these finite resources.

With offices and factories around the globe, every facet of our organization has to operate flawlessly. By constantly evolving our design systems, manufacturing processes, and supply chain management, we work tirelessly to achieve that goal and to better service you, our valued partners.

Our 2018 catalogue showcases Island Stone's latest designs, including updates and improvements on products that have proven successful over the years. All of us at Island Stone thank you for your continued support and look forward to many more years of partnership committed to excellence.

# 1 NATURAL MOSAICS

# PEBBLE

---

THE HUMBLE BEAUTY OF A VOLCANIC PEBBLE WASHED AND WORN SMOOTH BY CRYSTAL CLEAR MOUNTAIN STREAMS INSPIRED OUR ICONIC PEBBLE TILE. WHY NOT BORROW FROM THE RIVER'S CLEAN DESIGN TO CREATE A SENSE OF SERENITY IN OUR STRUCTURES THAT MIRRORS THE NATURAL WORLD?

---

With the mantra "Many picked. Few chosen!" in mind, we source stones from a myriad of exotic locations and sort them by color and shape. Then, the pebbles are meticulously hand placed into interlocking patterns that imbue them with nature's effortless tranquility.

Evenly surfaced and easily installed, our elegant Pebble Series has proved itself as the mainstay of our business for many years. It isn't hard to see why: the pebble embodies durability and timelessness, without ever sacrificing the beauty of simplicity.

# RANDOM

---

MANY YEARS AGO, WHILE DESIGNING A NEW RANGE OF TILES, A STAFF MEMBER EXCLAIMED “ACAK,” THE INDONESIAN WORD FOR “RANDOM.” THUS, THE NAME WAS COINED AND SINCE THAT DAY, OUR RANDOM SERIES HAS GROWN TO BE ONE OF OUR MOST POPULAR BRANDS.

---

Building the tile is a much like putting together an intricate jigsaw puzzle: the big picture only reveals itself once the last, perfectly selected piece has been inserted.

Once the craftsman places that ultimate piece and is satisfied with the final design, our quality assurance process goes to work.

We ensure almost 100% consistency in terms of color, size and thickness with each tile. It is truly random in name only!

Discover why our Random Tile Series continues to bring life to the finest hotels and residences in the world.

# 2 GLASS

# GLASS

---

WE DRAW INSPIRATION FOR OUR GLASS SERIES FROM PATTERNS FOUND IN NATURE, LIKE THE DELICATE SYMMETRY OF PALM FRONDS OR THE SLEEK LINEAR SHAPE OF THE BANYAN TREE.

---

Island Stone has embraced glass as a medium with inexhaustible potential. We are continually experimenting and innovating this series, and are thrilled to provide an extensive list of options that will bring a grace and lightness to your space.

Glass tile has an elegant air of subtlety, yet it can transform a wall or a room into a memorable piece of art.

# GLASS

---

## FORMATS BY COLOR

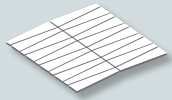

---

Glass is incredibly versatile: it can be fused into a staggering variety of colors to suit the interiors of any room. We choose to represent the tones often found in nature, such as the sparkling turquoise of a clear lagoon or the rich toned hues of the earth.

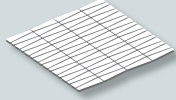

This tile is our interpretation of the delicate vibrancy of sea-glass, customized to accent the color scheme of your unique space.

Island Stone®

A close-up photograph of a stone wall, likely made of granite or a similar natural stone. The stones are rectangular and arranged in a regular pattern. The wall is partially obscured by a dark, diagonal overlay that covers the right side of the image. The text '3 QUARRIED STONE' is overlaid on the dark area.

# 3 QUARRIED STONE

# CLADDING

---

RAW CUT STONE IS BOTH STRIKING AND ENDURING, MAKING IT THE IDEAL MATERIAL FOR EXTERIOR CLADDING SURFACES OR RUSTIC INDOOR INSTALLATIONS.

---

At Island Stone, we first recognized the power of raw stone when individual pieces were placed together to create a dramatic finished surface. Realizing its potential, we slowly perfected the art of precision-cutting every piece and fitting the

stones together with the utmost attention to detail.

The beauty of this series lies in the individual textures, colors, and weight of each stone, which integrate to create a vivid masterpiece.

AND AVANT-GARDE DESIGN.

---

We build eye-catching reliefs by cutting stone into various exact shapes, honing their surfaces, and matching the honed pieces together to create an interlocking system. The rendering often appears 3-dimensional, even sculptural.

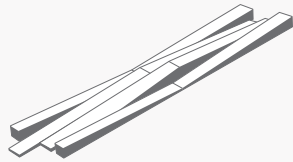

A Profile wall elevates texture beyond the traditional limits of stone tile, blurring the line between design and fine art.

## CRESCENT INTERLOCK

**CB1**

4" x 22 3/4"  
Stone depth: 3/8" - 7/8"  
Stone size: 1" x 11 3/8"

Interlocking wedge tile.  
Tile surface: Honed

# MOSAIC

---

OUR CRAFTSPEOPLE HONOR THE AGE-OLD TRADITION OF MOSAIC WITH THE SAME LEVEL OF PERFECTION, PRECISION, AND MODERN SENSIBILITY YOU HAVE COME TO EXPECT FROM ISLAND STONE.

---

We source materials from Indonesia and India, where our artists cut pieces of stone that are then laid out onto a mesh grid to create an easy-to-install single tile. Simple to cut, shape, and customize, this series is an Island Stone interpretation of a beloved classic.

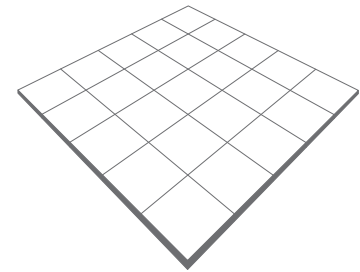

# CLASSIC MOSAIC SQUARES

# QUARRIED STONE

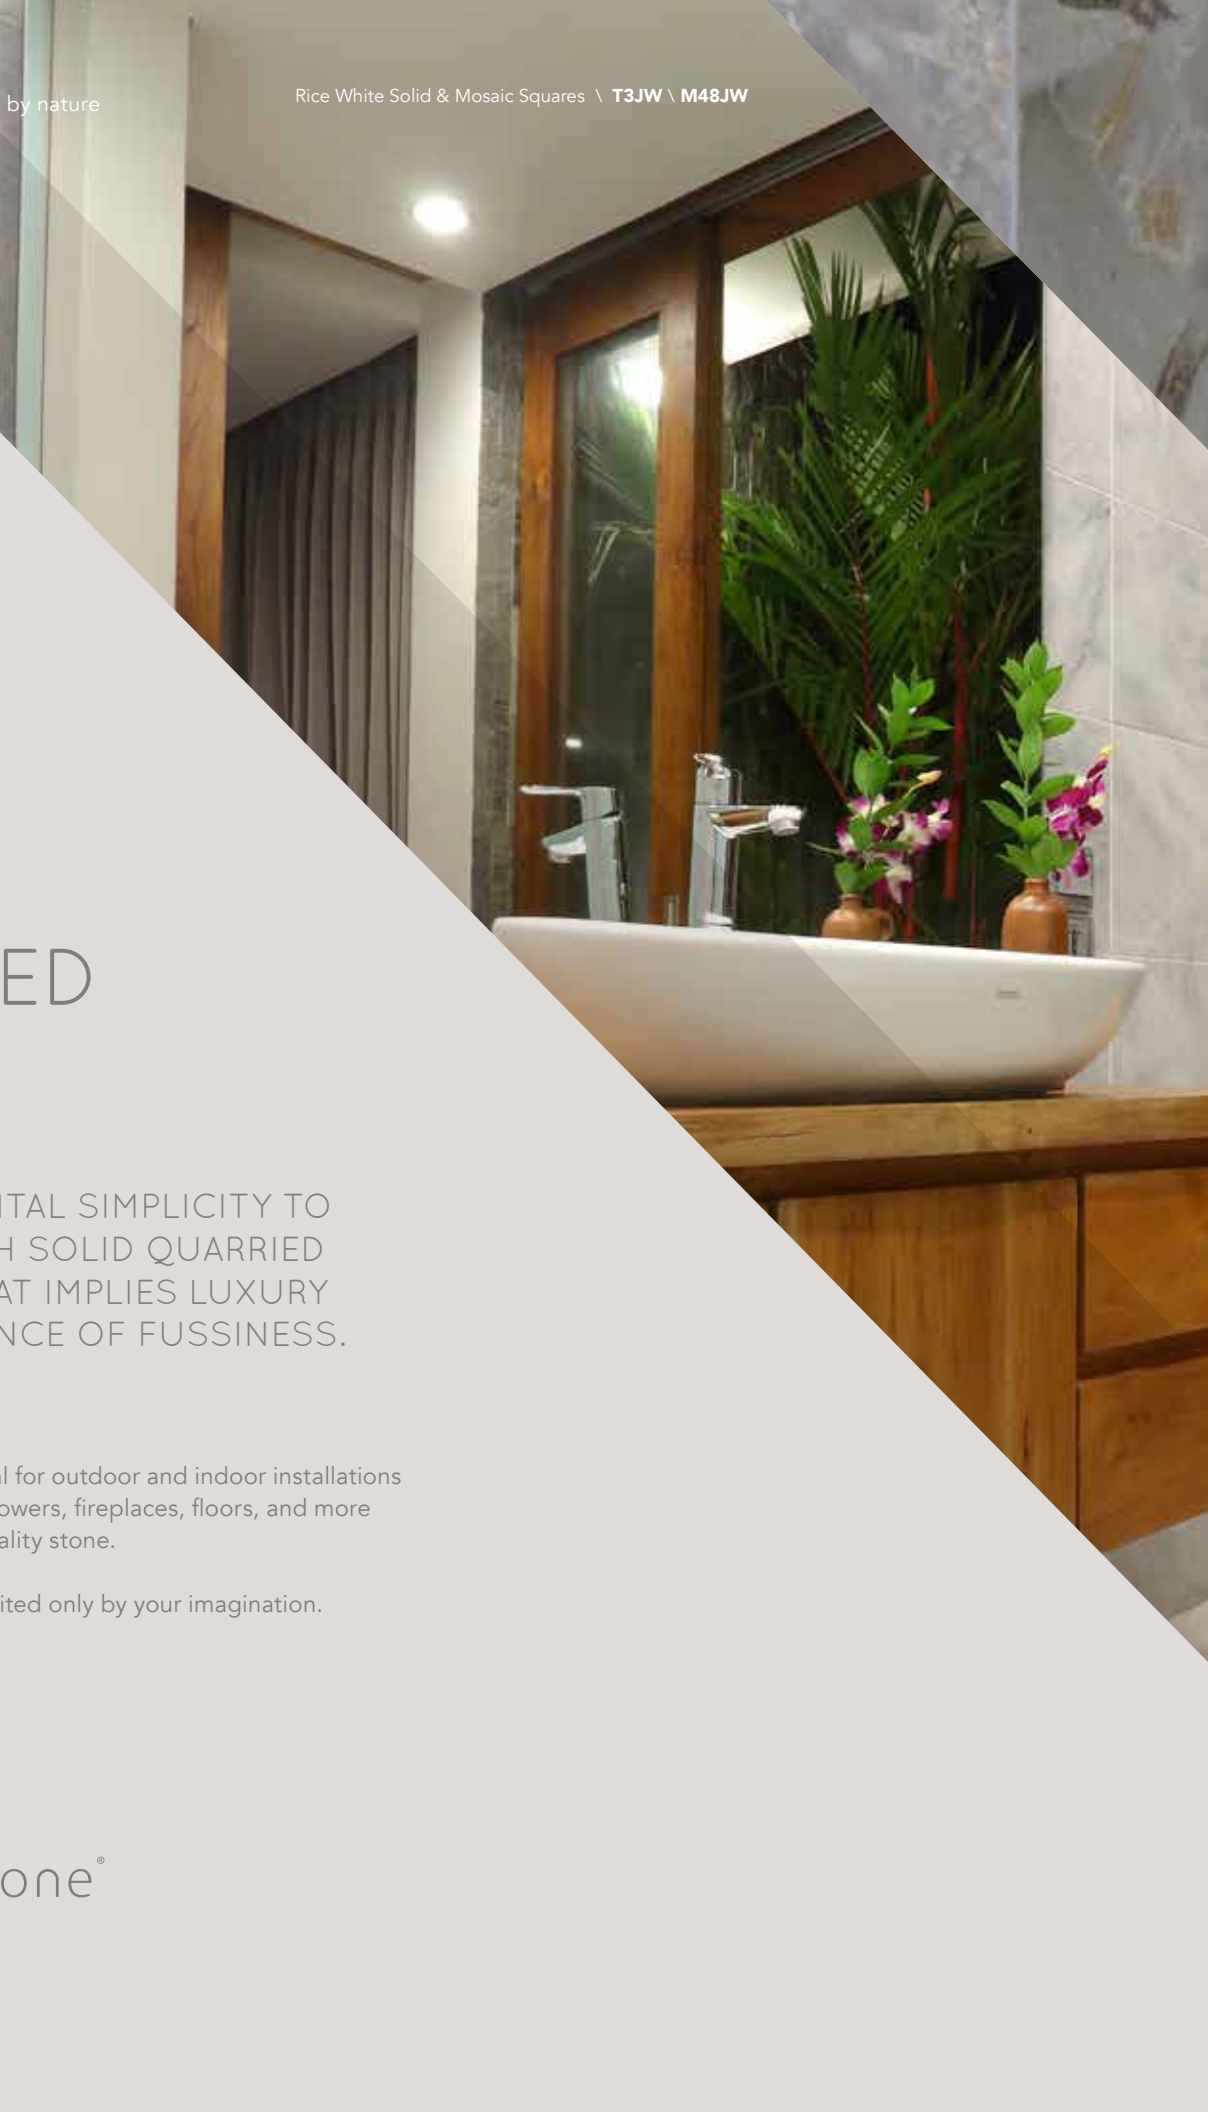

---

BRING AN ELEMENTAL SIMPLICITY TO YOUR SPACE WITH SOLID QUARRIED STONE, A TILE THAT IMPLIES LUXURY WITHOUT AN OUNCE OF FUSSINESS.

---

Our solid stone series is ideal for outdoor and indoor installations with a rustic flair. Imagine showers, fireplaces, floors, and more elevated by the drama of quality stone.

The possibilities are truly limited only by your imagination.

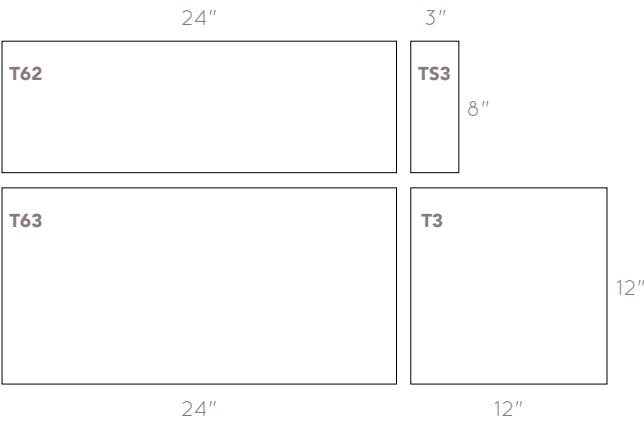

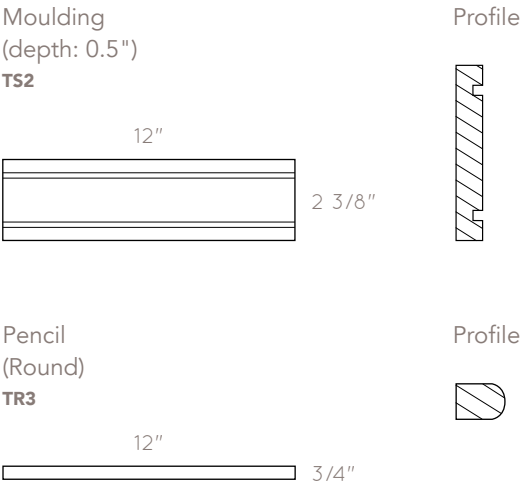

# SOLID TILES

Our Solid Tile range comes in a selection of pre-cut sizes and trims.

timber

# 4 ISLAND TIMBER

# TIMBER CLADDING

---

ISLAND STONE'S ROOTS IN EXOTIC INDONESIA  
ALLOWED US TO FALL IN LOVE WITH THE  
RUGGED BEAUTY OF OLD GROWTH TEAK WOOD.

---

For centuries, the people of Central Java and Sumatra constructed homes using teak in the traditional "Joglo" design. The wood is as durable today as it was when first felled, making it a perfect option for recycled timber cladding.

We source teak locally from unused homes and buildings, and then restore the timber to its original luster and beauty while

preserving its storied history. Some of our timber displays natural teak colors ranging from light golden hues to weathered, smoky greys; some Island Timber captures the classic, bright painted colors of island homes.

Recycled teak allows your space to tell the story of the islands, and invites you to breathe new life into an ancient material.

## PAPAN PLANKS

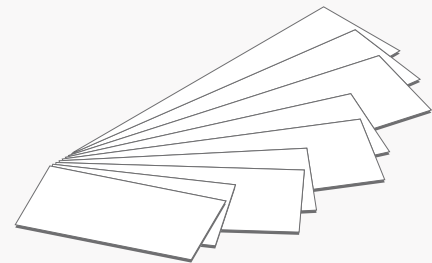

**KP1**

Coverage: 10.7 sq.ft/bundle.

Width: 6" (nominal  
dimensions) wide panels of  
varying length

Lengths & quantities of

\*Okay: Utilizing natural stone in any harsher environment requires following appropriate guidelines as relates to installation and regular maintenance. Always use a qualified installer.  
 \*No : Not Recommended

## FREQUENTLY ASKED QUESTIONS

- Q** Is installing these products difficult to do?  
**A** Product is easy to install. Comprehensive Installation guidelines available online at [www.islandstone.com](http://www.islandstone.com).
- Q** How do you cut Pebble & Random mosaics?  
**A** Use a standard wet tile saw with diamond blade for cutting stone.
- Q** Can product be used on corners and curved surfaces?  
**A** Product is on mesh allowing it be applied to curved surfaces. Tiles are easily cut or hand placed to wrap edges.
- Q** Is product difficult to clean and maintain?  
**A** Product is easy to maintain by regular sealing and can be cleaned with standard household cleaner appropriate for stone.
- Q** How do you clean these products?  
**A** Any basic cleaner is appropriate for these stones. For heavier duty we recommend a cleaner designated for cleaning "Natural Stone".
- Q** Do these product require special maintenance?  
**A** Natural stone maintenance is dependent on the environment. Resealing should occur periodically depending on the environment of the installation. Please refer to sealers for recommendations on when to reseal.
- Q** What is the recommended overage for a project.  
**A** Generally we recommend ordering an additional 10%. For complicated projects involving extensive cutting (many edges) 15% should be considered.

# INFORMATION

## GLASS

---

ISLAND STONE GLASS TILES AND MOSAICS ARE CREATED FROM A TRANSPARENT PANE OF GLASS THAT UNDERGOES A PROCESS IN WHICH A LAYER OF COLORED GLASS IS BAKED ONTO THE BACK SURFACE.

Behind the color a second layer of opaque (white) glass is baked to the back surface of the glass to maximize the brightness and allow for a through colored appearance.

## FREQUENTLY ASKED QUESTIONS

---

- Q** Do I need a special contractor to install glass tile?  
**A** Installing glass tile can be done by any qualified tile contractor. Installer should always follow TCNA guidelines to insure the quality of the final installation.
- Q** How do I cut Island Stone Glass?  
**A** Island Stone glass should be cut with a wet saw equipped with a glass specific wet saw diamond blade to eliminate chipping of the tile when cutting. Scorers and snappers (not a saw) can be utilized for making simple cuts with linear designs. Cutting of non linear mosaics should always be done on a wet saw. Format specific techniques for cutting select glass mosaics are included in boxes as well as offered online under "resources at [www.islandstone.com](http://www.islandstone.com)
- Q** What do I do if I chip the glass when cutting?  
**A** Orders should always account for some overage, but for minor chips you can use a diamond sanding block.
- Q** What can I do if I crack a tile once installed?  
**A** A qualified installer can cut out individual tiles using a dremel with a proper bit, but it requires careful handling to not damage other tiles.
- Q** What size grout joints do I use for glass?  
**A** For Mosaics, joints between tiles should match spacing on meshed sheet. For Beach tiles we generally recommend 1/16" - 1/8" grout lines
- Q** Are there special requirements for installation cleanup?  
**A** Special attention should be made when finishing a glass installation to insure no grout haze remains on surface- as once dry, grout can become more visible and affect finished installation.
- Q** How do I clean my glass tile?  
**A** Any standard glass cleaner can be used for regular cleaning. For heavier duty cleaning we recommend using FILA PS87 which is a heavy duty tile specific cleaner.
- Q** Is the glass see through?  
**A** The glass is transparent, but behind the color, we adhere an opaque white finish so that it can be applied over any surface without the color of the substrate affecting the brilliance of the tile.
- Q** Can I customize my order?  
**A** Yes we offer custom service, including alternative colors, blends, textures, shapes, size, etc, but require minimum order quantities and lead times to produce.
- Q** What kind of grout should I use?  
**A** While there are many possible options, we recommend using Bright White Sanded grout.  
Recommended Products:  
Grout: Bright White Sanded  
Sealing: Not necessary for glass, we recommend using a specific grout sealer designed for glass tile.  
Please ask your local tile dealer for available options  
Recommended Glass Cleaner : FILA PS87
- Q** Can you use glass in areas that get hot?  
**A** Yes glass will not be adversely affected by normal heated areas in a home.
- Q** Can you drill through glass?  
**A** Yes, you can drill through glass, but should use a specialized bit designed to drill through porcelain and glass to avoid cracking glass during process.
- Q** What is the recommended overage for a project?  
**A** Generally we recommend ordering an additional 10%. For complicated projects involving extensive cutting (many edge) 15% should be considered.
- Q** Beach Tile Specifications ?  
**A** 665 lb Breaking Strength,  
Freeze/Thaw: Passed,  
COF: Dry .83 / Wet .72,  
Resistance to Chemical Substance: Passed.

# INFORMATION

## QUARRIED STONE

---

THE STUNNING FORM OF ISLAND STONE'S QUARRIED STONE INTRODUCES A WHOLE NEW WORLD OF POSSIBILITIES.

Precision-cut, with either a natural or honed surface that enriches the color of the raw material, Island Stone Quarried Stone is truly transformational.

## FREQUENTLY ASKED QUESTIONS

---

**Q** Can I grout claddings?

**A** Yes, generally designed as dry stack, flat surface (non wedge relief) claddings such as Strip can be grouted, but special care required related to cleaning grout during installation on split face finishes

**Q** Do I need to seal claddings?

**A** Depends on use. In exterior or wet environments claddings should always be sealed. Water based penetrating stone sealers are generally recommended, but in environments where stone will face extreme exposure, oil based waterproof penetrating stone sealers may offer better protection. Always test sealer on stone as sealers can dramatically change surface appearance.

**Q** Can natural stone products be used in wet areas?

**A** Yes, approved stones (see chart) can be used in wet environments but should be applied to a waterproofed surface and should be sealed appropriately.

**Q** Can claddings be used on floors?

**A** Yes, flat surface (non wedge relief) claddings can be used on floors.

**Q** What size grout joints do I use for solids?

**A** Grout joints can vary to fit the look one is trying to achieve, we generally recommend between 1/16"-1/4".

**Q** How do I turn corners with claddings?

**A** Both miter cuts and butt joints are options. For details visit our online resources section at [www.islandstone.com](http://www.islandstone.com)

**Q** Are honed finished Solids tiles okay for floors?

**A** Solids can be used for floors. For COF specifications visit our online resources section at [www.islandstone.com](http://www.islandstone.com)

**Q** Can materials be used on curved surfaces?

**A** Yes, materials can be applied to a curved surface. Direction and length of product used, define the minimum radius required for material to fit curve.

**Q** Can you install material on any surface?

**A** Material should only be applied to a solid, immobile surface. If applying to drywall, we recommend first covering wall with a solid concrete board. If applying to a unique surface material make sure adhesive used is designed to work with both the tile and surface.

**Q** What is the recommended overage for a project?

**A** Generally we recommend ordering an additional 10%. For complicated projects involving extensive cutting (many edge) 15% should be considered.

\*Okay: Utilizing natural stone in any harsher environment requires following appropriate guidelines as relates to installation and regular maintenance. Always use a qualified installer.  
 \*No : Not Recommended

# VTILE

## OPENING A NEW DIMENSION IN DESIGN

Arguably the most versatile natural stone material on the market, its unique 3-dimensional structure offers designers a myriad of approaches to creating dramatic contemporary designs. The points below outline what areas to consider when looking to create original distinctive VTILE designs.

### LAYING DIRECTION

**Vertical**

- Popular with smaller, taller surfaces, vertical VTILE designs give surface a stronger, imposing presence.

**Horizontal**

- The most common approach, bringing a wall to life with a distinct eye-catching background.

**Varying directions**

- Creates a complex illusion of shapes as light plays over the crisscrossed wedges.

### PROFILE - PLACEMENT

**Wave**

- Placing VTILES back to back to create an undulating surface with a natural personality.

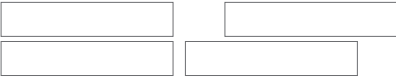

**Stack**

- Placing VTILES in the same directional manner to create powerful geometric designs.

### ELEVATION - OFFSETS

How an individual VTILE is placed as relates to the piece placed prior.

0% offset      25% offset

50% offset

100% offset (wave design only)

## VTILE SINGLE & MULTIFORMAT INSPIRATION

A small selection of the many popular, easy to install layouts for VTILES.

**VTILE - Stacked**  
25% offset

**VTILE - Wave**  
25% offset

**VTILE - Stacked**  
100% offset, opposing directions

**VTILE & Large V - 1 to 1 stacked**  
50% offset

**VTILE & Large V - 1 to 1 wave**  
50% offset

**VTILE & Large V - 2 to 1 stacked**  
50% offset, opposing directions

# INFORMATION

## ISLAND TIMBER

---

OUR WALL CLADDINGS ARE DESIGNED EXCLUSIVELY FOR WALLS AND/OR OTHER NON-TRAFFIC AREAS.

Panels and claddings are cut to a minimal thickness to offer a lightweight, versatile design. Surfaces are finished with a light coating to protect and enhance the product's appearance.

## FREQUENTLY ASKED QUESTIONS

---

**Q** How do I install Island Timber products?

**A** Island Timber wood panels and claddings can be used on virtually any clean, flat and sealed surface. All timber products are designed to be permanently applied to a wall or ceiling. We recommend using an adhesive along with nails to adhere. Detailed instructions are available on our website.

**Q** Where can I use Island Timber?

**A** Island Timber wall claddings are designed exclusively for walls and/or other non traffic areas.

- Residential interior walls: Living room, bedroom room, kitchens and bathrooms.
- Commercial interior walls.
- Exterior. Teak is renown for its resilience to weather, but all wood will weather over time and tile installed in adverse or high exposure areas will require maintenance to keep product from deteriorating.
- Not recommended: High heat environments, wet environments, exposure to chemicals.

**Q** Who do I hire to install Island Timber?

**A** Tile installers or general contractors can install Island Timber products by following our instructions provided in detail on our website.

**Q** Can I use this in an area that has fire rating requirements?

**A** We have tested the ¼" thick teak and received back a "B" fire rating which is acceptable for most projects.

**Q** Where is the wood from?

**A** We salvage our reclaimed teak from homes in Indonesia that have previously been torn down.

**Q** Do I need to seal?

**A** No, sealing is not required. Teak contains natural oil that maintains its appearance. If used in an exterior installation, occasional re-application of teak oil is recommended.

**Q** Can I use for flooring?

**A** Use on floors is not recommended due to the thin design of the products.

**Q** Can material be used on a fireplace?

**A** Material can be used in areas of fireplace that are not exposed to flames such as facade.

**Q** Can wood be stained/painted after application?

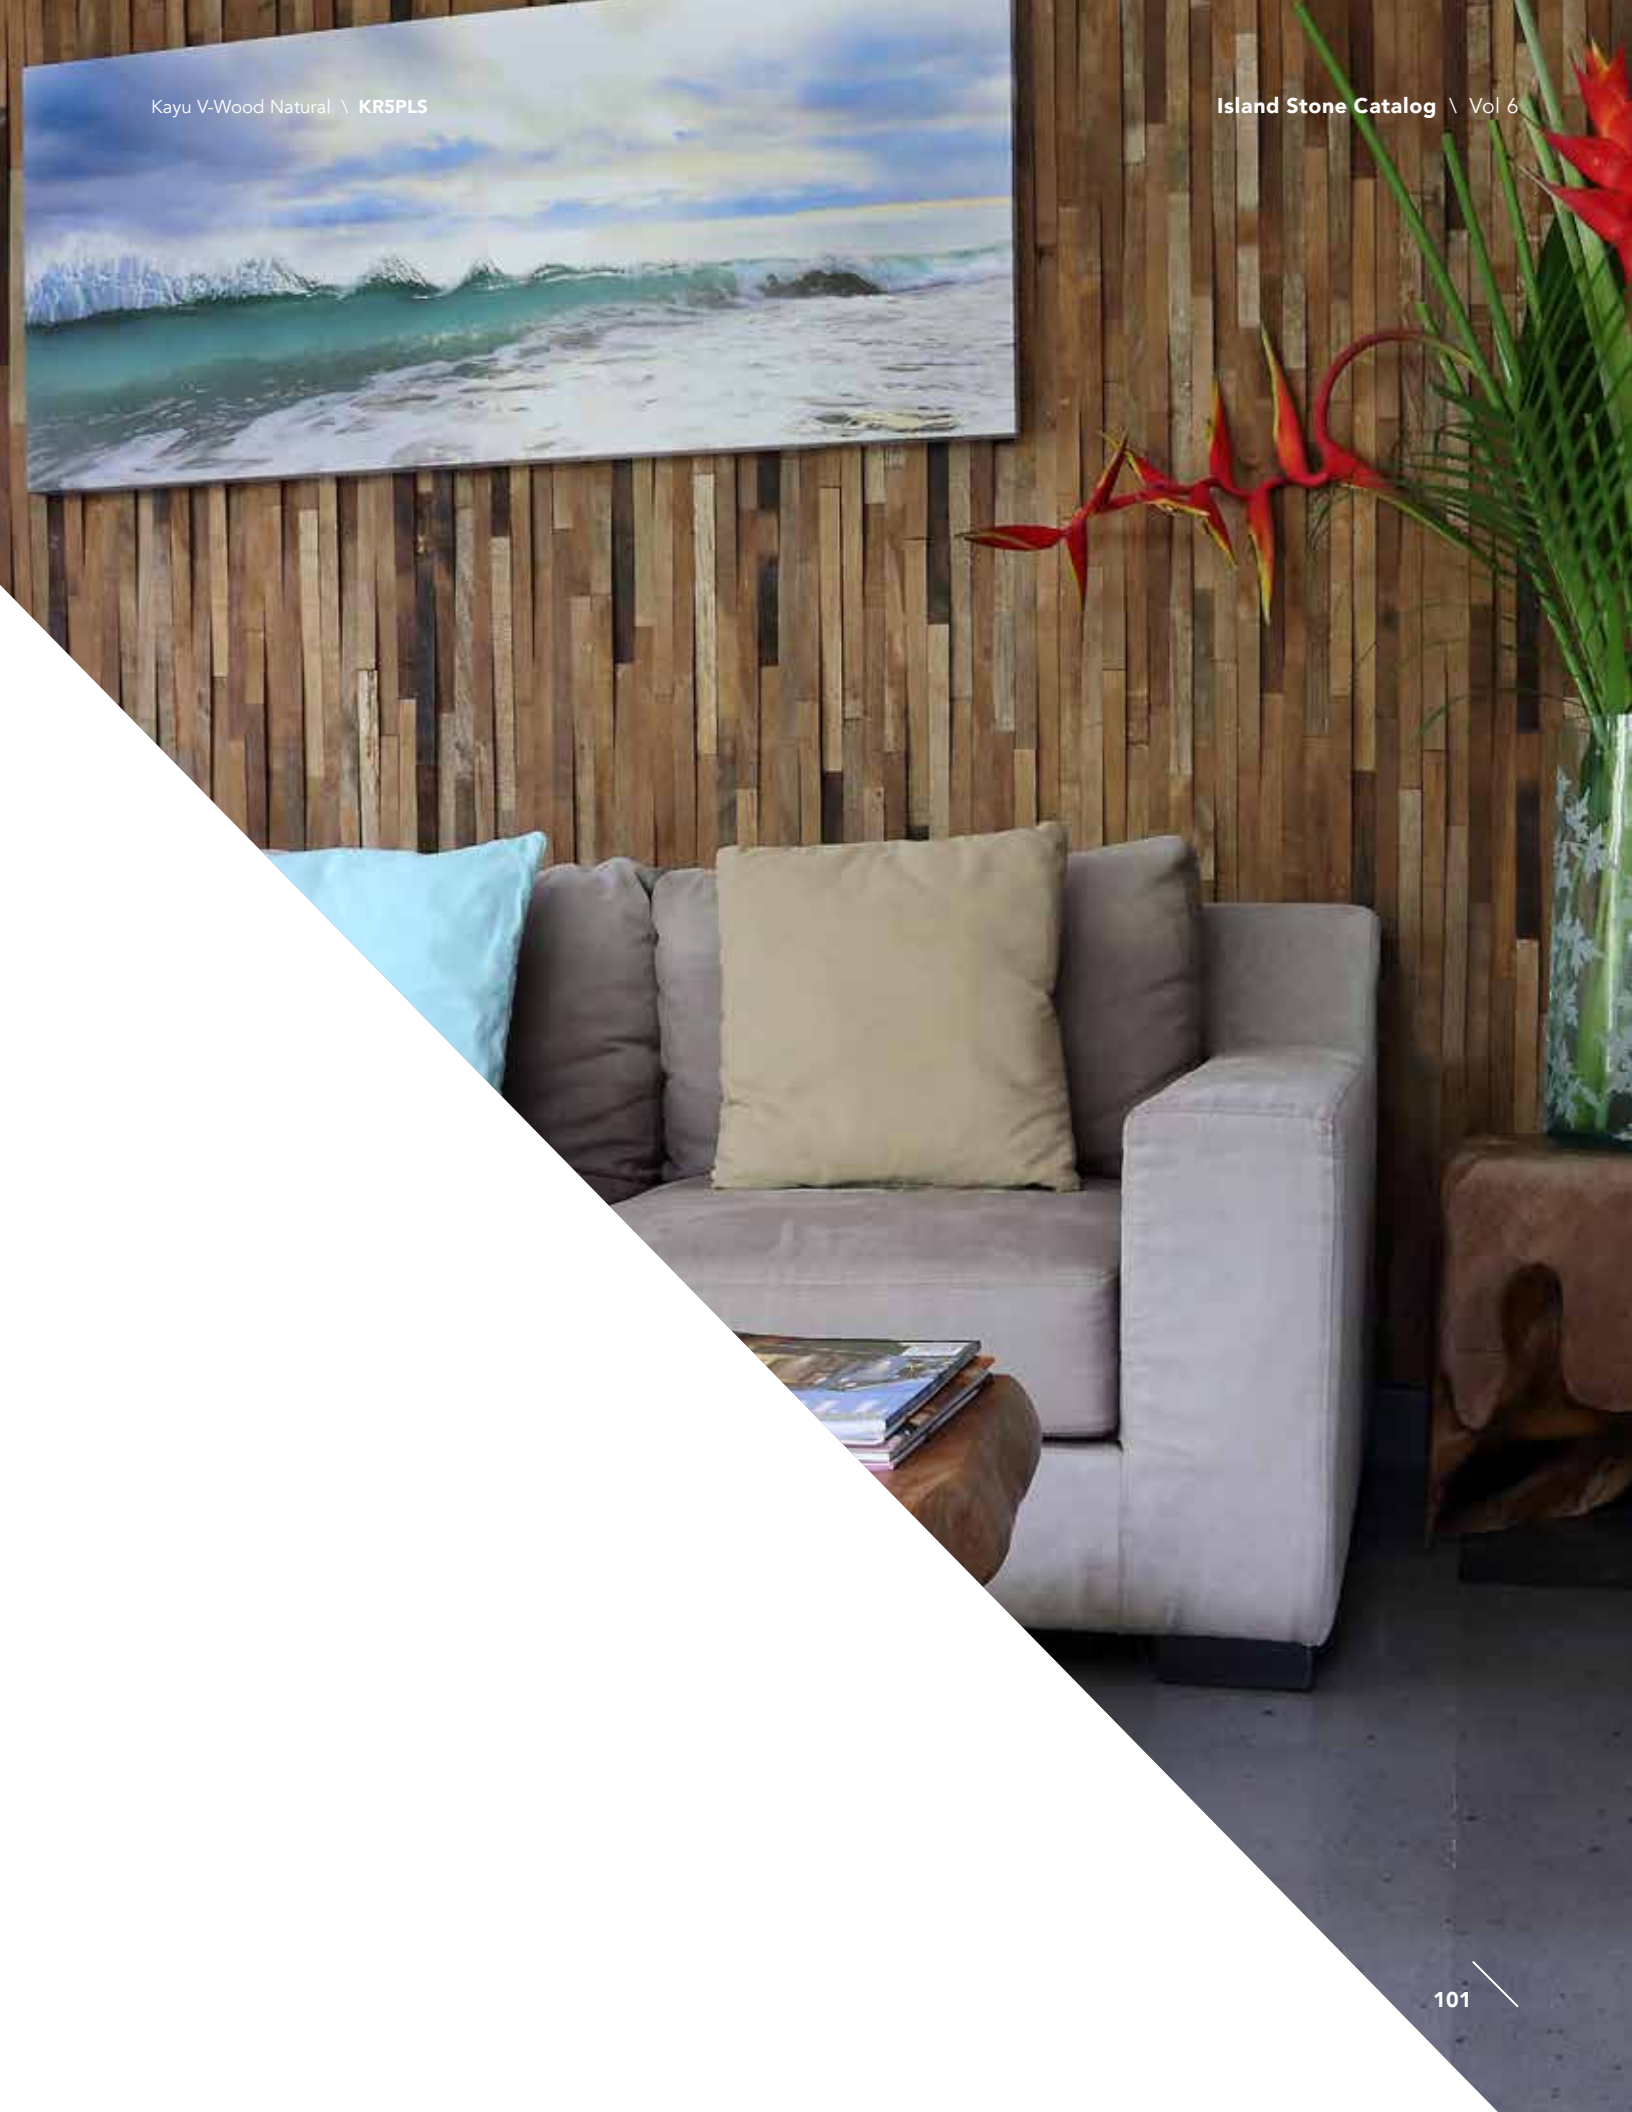

**A** Product is sold as finished. Application of additional finishes is not recommended.

**Q** Can I get custom colors?

**A** Custom colors or single colors are available as a special order.

**Q** Does product need to acclimate before being applied?

**A** A one week acclimation period is recommended.

# THANK YOU

---

ISLAND STONE'S PHILOSOPHY REVOLVES AROUND CONTINUALLY RE-INVENTING OURSELVES AND EMBRACING NEW MEDIUMS THAT BOTH COMPLIMENT AND ELEVATE OUR ORIGINAL ICONIC PEBBLE.

---

None of this innovation would be possible without the partnerships we have created around the world with creative, hard working, and compassionate people. Our exotic roots provide a continuous inspiration that moves us to share the rich beauty of Indonesia, our adopted island home.

Thank you for continuing to support Island Stone and Island Timber, and for believing in the pebble that would launch a 20-year business. We hope you enjoy the products made possible by inspired design, perseverance, and partnership.

Island Stone®
