GLAZED BASALTO™

## GLAZED BASALTO

Enter the colorful world of Glazed Basalto by New Ravenna. Our design team has meticulously selected 24 pigmented glazes in jewel tones, earth tones, and metals. This material is beautiful on its own and can also be combined with any of our other natural stones. It's so versatile, it can be selected for use in almost any of our custom mosaic designs.

Glazed Basalto is a volcanic stone exclusive to New Ravenna in the United States and maintains its pigmented color glaze in every iteration. Creative Director, Cean Irminger, says about the volcanic stone, "Glazed Basalto is more than just a pretty face. It holds onto its brilliant color no matter which finish you apply and can withstand a huge amount of wear and tear without losing its vibrancy. The hand glazing process creates a shifting color palette that gives incredible depth to the material, and the natural geode inclusions catch that glaze and add a wonderful organic, unexpected texture. It is truly the unicorn of the stone world."

Inside, you'll find patterns from our portfolio that our design team thought were destined for new, dynamic colorways. The collection celebrates the full spectrum of colors in the Glazed Basalto palette and includes designs inspired by mid-century modern graphics, Arabian Nights, textiles, quilting, and nature. Also included are designs from our art deco-inspired collection, "Bright Young Things," and from "The New World," our collection with interior designer Sasha Bikoff.
