

An underwater photograph showing a rocky seabed in the lower-left corner, transitioning into a deep teal gradient that fills the rest of the frame. The text 'BIOME™' is overlaid in white in the upper-right quadrant.

BIOME™

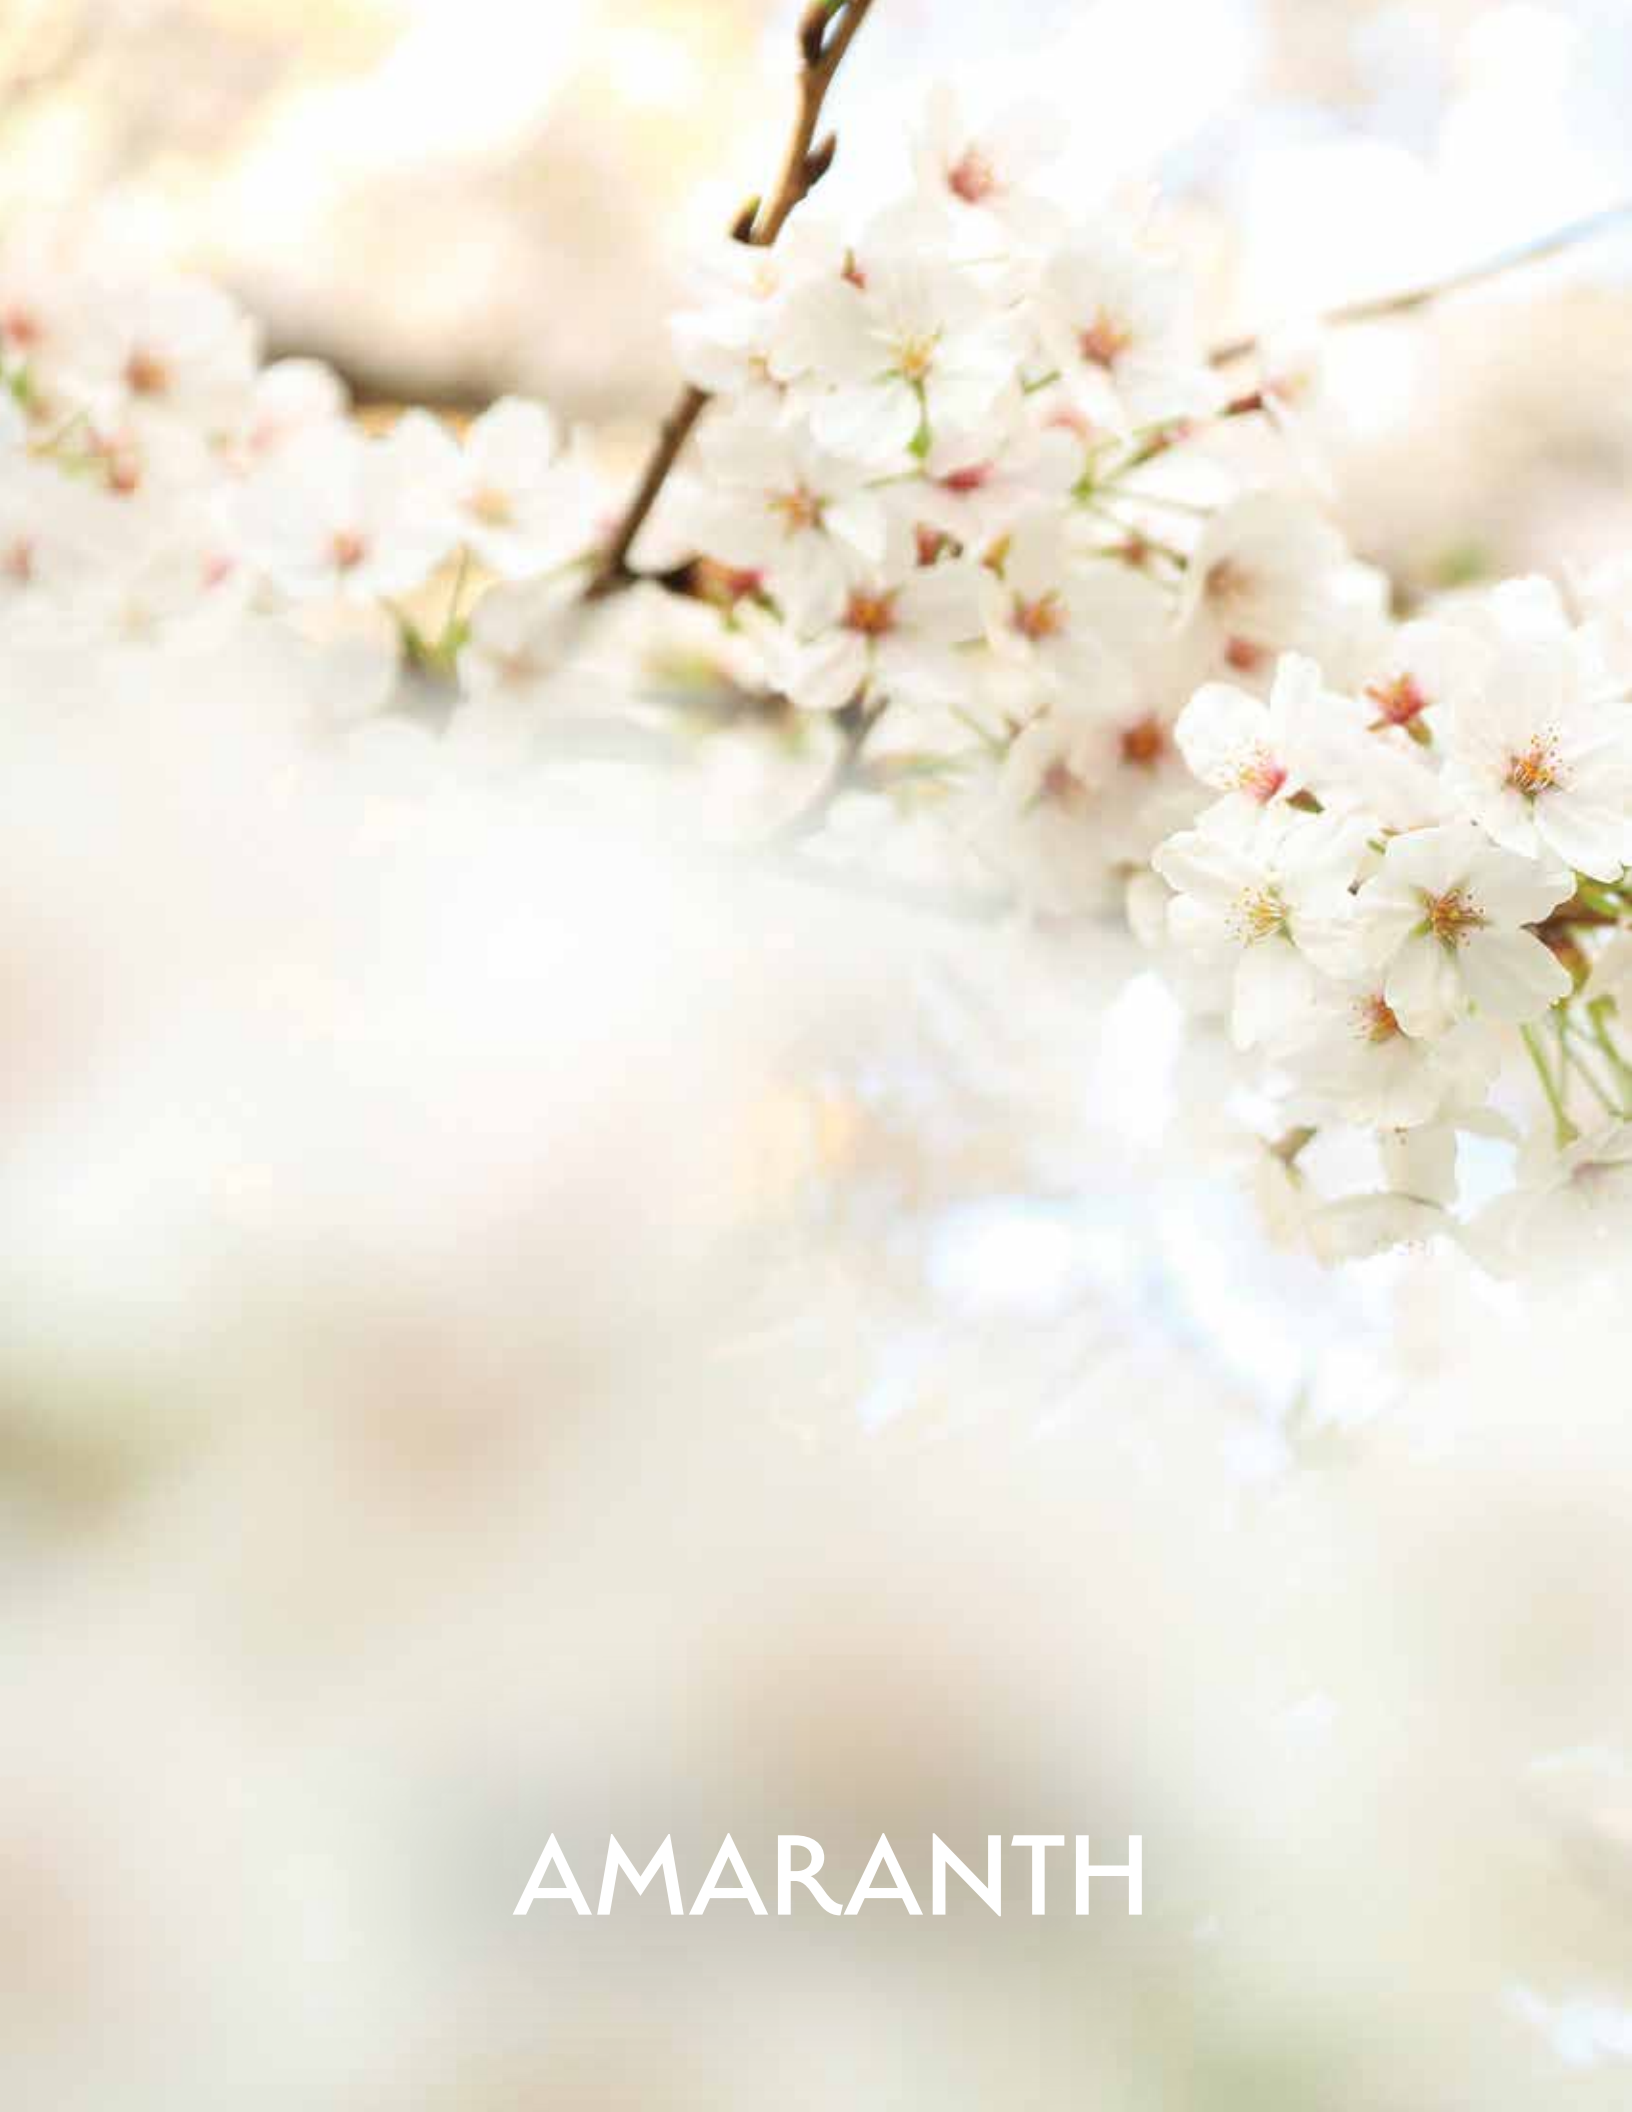

Biome was inspired by the shapes, textures, and patterns found in nature. The collection was explored and connected through color palette, with three patterns representing each of the five biomes. A biome, by definition, is a naturally occurring community of flora and fauna, with five primary biomes on earth: tundra, aquatic, forest, grassland, and desert. New Ravenna deconstructed the five biomes to explore the variety of life and terrain found in these disparate climates. Together, the collection demonstrates the interconnectedness and repetition of pattern throughout nature. Each of the five biomes has a unique color palette that captures the essence of that environment.

Cean Irminger, New Ravenna's creative director, says of Biome, "Our natural world is a major source of inspiration and solace. When palette and pattern overlap, we can completely change the perception of a design; a pattern that was based on a fossil from the desert now reads as a meadow flower in white and green, or a falling snowflake in white and gray. On a grand scale, Biome reveals the interconnectedness of nature and design. When examined closely, Biome illustrates the chameleon quality of mosaic and its ability to express a narrative through color."

FOREST

The forest biome is the woodlands of the world, from tropical rain forests to ancient old growth trees. To achieve a rich natural feel, the palette includes deep earth browns and reds, verdant greens, and golds.

AMARANTH Nero Marquina (t), Rojo Alicante, Giallo Reale, Travertine Noce (p)

COCOON Thassos, Sweetgrass (all p)

QUEEN PALM Saint Richard (h), Red Lake, Rojo Alicante (p)

GRASSLAND

The grassland biome represents the Great Plains, meadows, and expansive green vistas of the world. Bright tones capture the flowering abundance of these temperate climates with Glazed Basalto jewel tones and light backgrounds conveying sunshine and growth.

AMARANTH Cloud Nine (t), Blue Macauba, Spring Green (p)

CURRENT Fern, Spring Green, Eucalyptus, Sweetgrass (all p)

FOSSIL Sweetgrass, Thassos (all t)

REPTILE Verde Alpi (t)

RIVERBED Verde Luna, Chartreuse, Emperador Dark (h), Spring Green (t)

GEODE Thassos (h), Indigo, Orchid, Cornflower, Hydrangea, Aloe, Lotus, Periwinkle, Celeste, Carrara, Blue Macauba, Aurum (p)

SNOWFALL Cloud Nine, Blue Macauba, Verde Luna, Jerusalem Gold, Orchid (all h)

WILDFLOWERS Blue Macauba, Goldenrod, Thassos, Iris, Nero Marquina, Sweetgrass, Zinnia (all p)

DESERT

The desert biome is unmistakably associated with heat, sun, and sand. This climate is captured through warm creams, browns, and tans. Tumbled and honed finishes provide the feel of cracked earth and edges that have been softened by windblown sand over thousands of years.

AMARANTH Jerusalem Gold, Thassos (all t)

COCOON Jerusalem Gold, Lavigne, Travertine Noce (all h)

FOSSIL Jerusalem Gold, Lagos Gold (all t)

GEODE Rojo Alicante, Saint Laurent, Emperador Dark, Giallo Reale, Crema Valencia, Travertine Noce, Red Lake, Aegean Brown, Aurum (p), Jerusalem Gold, Nero Marquina (h)

RIVERBED Montevideo, Kehena, Cashmere (h), Driftwood (t)

SEAFOAM Lagos Gold (vh)

STRATUM Aurum (p), Travertine Noce, Lagos Gold, Jerusalem Gold (h)

AQUATIC

The aquatic biome encapsulates the earth’s sources of salt and fresh water. Cool dark tones in blues and greens capture the aqueous element, with iridescent accents that emulate fins and shells. Bold pops of color capture the vivid life of tropical reefs.

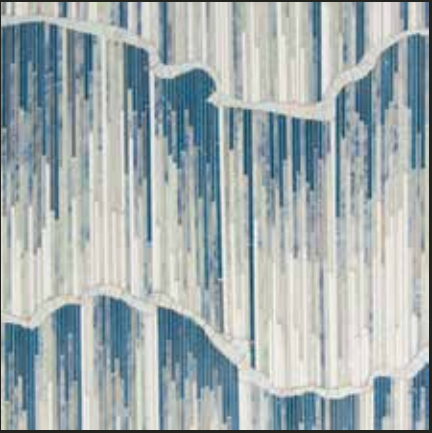

COCOON Orchid, Indigo, Kay’s Green (all p)

CURRENT Periwinkle, Indigo, Cornflower, Thassos (all p)

GEODE Thassos (h), Dolomite, Afyon White, Carrara, Allure, Celeste, Bardiglio, Mercury (p)
