

Discover the Elegance of our Honed Quartz Series

Explore the comprehensive selection within the PentalQuartz product line, featuring a diverse spectrum of colors amongst two distinct finishes: polished and honed. Each finish not only exhibits a unique appearance but also possesses subtly varied characteristics.

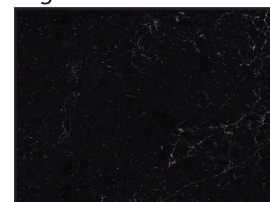

PentalQuartz is a stunning and resilient surface that's easy to maintain. We present several designs in our honed finish, which offers the softer appearance of a low sheen texture. The more subdued appearance of honed quartz complements a variety of design styles, from rustic to contemporary, offering greater flexibility in interior design choices. While there are several advantages to selecting honed designs, the finish requires slightly more maintenance than our polished finished materials, as it has the potential to show more signs of daily use. The matte finish of honed quartz countertops lacks the reflective properties of polished surfaces, making fingerprints and marks from cookware, food or beverages more noticeable. Additionally, the slightly rougher texture of a honed surface can retain oils and residues, leading to increased visibility of marks and smudges. That being said, most marks can be easily wiped away with a non-abrasive cleaner (such as Soft Scrub Advanced Cleaner) and a cleaning eraser!

Over time, the honed finish undergoes a natural evolution, acquiring what is commonly termed a patina, personalized to the individual usage patterns of the homeowner.
